

weber.pas Akril

Akrilna tankoslojna fasadna žbuka na osnovi umjetnih smola namijenjena za dekorativnu obradu mineralnih podloga ili kao završni fasadni sloj u weber.therm fasadnom sustavu toplotne izolacije.

Prednosti proizvoda

- jednostavnost izrade
- omogućava dodatak weber.pas aditiva, koji skraćuje vrijeme sušenja pri temperaturama od 0°C do 5°C
- u svih 362 tona po weber ton karti i tonovi po želji
- provjeren i trajan
- vodoodbojan
- sa dodatkom protiv algi i plesni
- površinski tvrd
- preporučena uporaba u weber.therm family fasadnom sustavu

O PROIZVODU

Tankoslojni fasadni završni sloj na bazi umjetnih smola.

SVOJSTVA I PREDNOSTI

weber.pas akrilna žbuka je vodoodbojna, paropropustna, otporna protiv alkalija i dimnih plinova, periva te otporna na smrzavanje.

Strukture žbuke: zaribana i vučena struktura.

BOJE I ZAVRŠNE NIJANSE

weber.pas Akril po želji može ići u svim tonovima weber ton karte.

TEHNIČKI PODACI

Umjetna smola, marmorni pijesak, punila, visoko kvalitetni pigmenti, aditivi.

Gustoća: 1,8 kg/dm³

Koeficijent paropropustnosti: $\mu =$ cca. 90

SD vrijednost u fasadnom sustavu: 0,6

Koeficijent prijema vlage: $w < 0,05$ kg/m²

PRIPREMA

Mineralne podloge (vapnene, vapneno – cementne) moraju biti suhe, tvrde i bez deformacija koji su uzrokovane smanjivanjem, savijanjem ili slijeganjem.

Nove podloge, npr. fina žbuka moraju biti izrađene u skladu sa normativima. Podloga mora biti ravna i bez pukotina.

Thermo žbuku površinski armiramo (u skladu sa važećim normativima koji su pri kontaktnim tankoslojnim fasadnim sustavima).

Pri sanaciji podloga mora biti očišćena od slabo prionjivih i otpadajućih dijelova, od ostataka starih žbuka i premaza.

POTROŠNJA

Proizvod	Granulacija	Oznaka proizvoda	Okvirna potrošnja na m ²
weber osnovni premaz		G700, G705	0,20 kg
weber.pas akrilna žbuka			
<i>zaribana struktura</i>			
posebno fina žbuka	1,0 mm	R070	1,80 kg
fina žbuka	1,5 mm	R970	2,50 kg
srednje zrnata žbuka	2,0 mm	R870	3,30 kg
grobno zrnata žbuka	3,0 mm	R770	5,00 kg
<i>vučena struktura</i>			
srednje zrnata žbuka - strukturirana	2,0 mm	R470	2,50 kg
grobno zrnata žbuka - strukturirani	3,0 mm	R370	4,50 kg

APLIKACIJA

Obzirom na vrstu podloge preporučujemo sljedeću izvedbu:

Osnovni premaz:

Weber osnovni premaz (G700, G705) nanese na podlogu dan prije nanosa završnog fasadnog sloja. Sa njim neutraliziramo podlogu i ujednačavamo upojnost.

Nanošenje žbuke:

Weber.pas akrilnu žbuku dobro promiješamo u kanti. Ako je potrebno dodamo i malo vode. Žbuku nanosimo na pažljivo pripremljenu podlogu u debljini najvećeg zrna pomoću gletera i kružno je zaribavamo. Grublju strukturu ćemo dobiti ako upotrebljavamo gleter od pluta. . Moramo paziti da se kontaktno područje dvije razine skela zaribava u isto vrijeme, mokro na mokro i sa istom vrstom gletera. Zbog jednakosti tona preporučujemo da istovremeno izmješate sadržaju više kanti u većoj posudi.

Nanošenje završnog fasadnog sloja u više tonova:

Sa weber.pas topDry žbukom također možete izvoditi višebojne kombinacije na jednoj površini.

Mjesta na kojima se budu nanosile različite nijanse fasadnog završnog sloja zaštitimo sa ljepljivom trakom. Nakon što nanese prvi ton završne žbuke odstranimo ljepljive trake. Idući dan zalijepimo ljepljive trake po rubovima prethodnog dana nanese fasadne žbuke i nanese drugi ton. Pri tome pazimo da ne isprljamo prethodno završene površine.

Savjet:

Preporučujemo uporabu svjetlijih tonova – Indeksa odbijanja svjetlosti (HBW) iznad 25.

Debelina nanosa:

Debelina nanosa na weber.therm sustavima toplotne izolacije: zaribana struktura min. 1,5 mm, vučena min. 2,0 mm.

UVJETI UPORABE

Temperatura pri izvedbi: +5°C do +25°C podloge i zraka. Izbjegavati radove pri neposrednom osunčanju i pri mogućnosti kišnjenja površina.

PAKIRANJE

weber.pas Akрил je pakiran u 25 kg kantama.

Upozorenje

Otpad odložite na za to određena odlagališta.

SKLADIŠTENJE I ROK UPORABE:

Do 6 mjeseci u izvornoj, neotvorenoj ambalaži u suhom i prozračnom prostoru, zaštićenom od smrzavanja i visokih temperature.

OPĆI UVJETI

Društvo Saint-Gobain Gradbeni izdelki d.o.o. preuzima odgovornost za kvalitetu svojih proizvoda u okviru općih uvjeta prodaje i isporuke. Zbog velikih razlika u vremenskim i drugim uvjetima izvedbe, gornje upute valja shvatiti kao opće smjernice, bez jamstva za izvedbu. Uzmite u obzir i službene smjernice, normative i podatke iz tehničkih listova. Podaci u gomjim uputama nas ne obvezuju. Shvatite ih kao preporuke sastavljene u trenutku najnovijeg stanja tehnologije izvedbe. Pretpostavljamo da je izvođač upoznat s izvedbenim tehnikama pojedinačnih komponenti. Navedeno nas ni u čemu ne obvezuje.

* Prikaz boja je informativnog karaktera, naručivati isključivo izabirom boja iz tiskane ton karte
